

Dear Commissioners,

The airwaves are "THE" public forum of our age. The internet which I use everyday is a useful resource. But it tends not to be a forum. We each go to those sites which are particularly appealing to us. We need a variety of independently produced news radio and TV stations. If a large corporation dominates a local communities radio and TV outlets, we will be denied the variety of viewpoints we need. Large corporations tend to look at their operation only in terms of profitability. They will avoid controversy and produce bland me too programming. Worst if dominated by unscrupulous tyrants they may use their power to influence elections. Some believe that this has already happened in Florida. KEEP the RESTRICTIONS, because these airwaves are limited. Don't allow anyone no matter how nice they seem, to control what is said on the air. We need to promote independent radio and TV, we need more restrictions not less.
